

The method for total de-dusting

AIR DUSTER MT2607 is a compressed air in a container with a capacity of 400 ml.

The main advantages of AIR DUSTER MT2607:

- intensive blower to remove dust and dirt from the most inaccessible places
- perfect for all the surfaces, especially those where you cannot use wet or chemical cleaning
- Ideal for computers, office equipment, printers, accessories, photographic, precision mechanics, electronics, etc.

Features:

- AIR DUSTER 400 ml: for blowing dust and debris from inaccessible areas of electronic equipment (computer keyboards, printers, CD-ROM/disk drives, copiers, fax machines, etc.). Danger of short circuits therefore minimized.
- Variable spray intensity. Environment-friendly. 100% ozone friendly gas. Contains no CFC or HCFC. Pressurized container.
- Includes tube for easy cleaning
